- 1) # of Parameters (avg/max per method): TwitterClient.java=>TwitterClient
- 2) Make a class that will enclose several of these parameters and give access to them
- 3) Yes, since it has a maximum of 10
- 4) 3; backOffMillis = 0; backOffMillis != 0 and backOffMillis <= capMillis; backOffMillis != 0 and backOffMillis > capMillis
- 5) I have no idea
- 6) $(806/3526)*100 = 22.86\%$
- 7) $(761/3526)*100 = 21.58\%$
- 8) $(3400/3526)*100 = 96.43\%$
